Brief About the Knimbus.com   (http://www.knimbus.com)

Knimbus is a research platform to discover and share knowledge. The company's vision is to democratize knowledge and transform how innovation is done globally. Knimbus has become the common platform for R&D across 650+ leading institutions including the IITs, IIMs, CSIR Laboratories, and top universities.

Knimbus has been covered in various media across the world for its unique concept & cutting edge technology: The Economic Times, The Times of India, The Hindu , Columbia University, Yourstory, DAREand many more….Knimbus was founded by 2 seasoned entrepreneurs, Rahul Agarwalla and Tarun Arora. The founders bring with them several years of experience working in the Silicon Valley and in Japan, and education from leading institutions in India and the US.

Knimbus operates in the $25 billion scientific, technical & medical information market, with potential to bring a disruptive change. Towards this goal the company has built a highly scalable cloud platform that can handle big data (100s of millions of journals, e-books, patents…), offer real time collaboration and social network features for knowledge workers.
