Role	**Play a visible role in a strategic initiative (Vivacious TCS) for the company to create an impact on 270,000 and growing consumers within the company. A lifetime opportunity to create an impact at an organization level.**
Details of The Project(A short Briefing on the Project may be attached with this document for candidate-briefing). It may be shared with external stakeholders like job-agencies etc.	**Vivacious TCS is a strategic initiative to create the organization of the future which is dynamic, full of life, high energy and socially connected. To achieve this we are focused on a culture change, simplification of processes, building a social platform and number of mobile applications which will help associates to sense, adapt and respond with agility to customer, fellow associate needs and to perform their roles in the company with greater joy and satisfaction. Given this charter, the role Of Lead Digital Workplace is to create strategy and be responsible for creating the work place of the future using digital technologies, and approaches which lends to creating a differentiated and relevant work place for the associates. The role requires engaging with the leadership team to continuously define the art of the possible, with associates (consumers) across different locations, roles, and business functions to create a unique experience.**
