

## **Tata Consultancy Services has an opening for UI/UX designers**

### ***Who we are & What we need***

***Learning Solutions***, an applied R&D team at Tata Consultancy Services, is engaged in creating tools, methodologies and curriculum for Gen Y learning and development. We are headquartered in Gandhinagar, Gujarat, where our team comprising multi-media skills and domain expertise, work in a vibrant and creatively charged environment. We produce unconventional solutions for any learning intervention. The applicant needs to be tech savvy, knowledge hungry, severely right-brained and open to relocating to Gandhinagar.

**We need applicants with expertise in UI or UX Design.** Skills in writing and/or film-editing/animation would be great.

### **The applicants SHOULD:**

- Be open minded enough to explore, research, discover and create roadmap for solutions that people may not always realize they need
- Be able to elicit constructive feedback and interpret that feedback into improving design solutions.
- Be able to collaborate with others and work well with developers and product management.
- Be able to solve all sorts of design challenges with creativity, efficiency and precision; a full stack designer (interaction, usability, graphic design, html, css) would be most welcome.
- Have excellent GUI Design skills with deftness at handling colour and typography.
- Have background in handling projects focused on user experience.
- Have custom web design skills that show creativity beyond applying third-party templates.
- Be self-motivated, confident and able to work in a fast-paced environment.
- Have excellent communication skills, both written and spoken English, with both technical and not-so-technical people. Ability to explain why a design works or why it doesn't.

### **The applicants COULD:**

- Have Interaction design skills: wire framing, prototyping, HTML5, CSS3.
- Have a passion for semantic mark-up and standards.
- Be able to integrate UX into Agile development practices since we release working software in short iterations.
- Have experience with: iOS design, Android design, front-end design, OSX design, interaction design.
