

GREENFIELD RESOURCES PVT. LTD.

Greenfield Resources is one of the fastest growing organizations in Software Exports & IT enabled service industry. With presence in US, Canada, UAE & India it provides end-to-end IT Solutions like designing, web development, consulting, marketing and maintenance to major recyclers and other big companies all over the world. Some of the key projects are listed below

Freelancers are required for following projects

1. www.shippingexchange.com

Company Information - Shipping Exchange is World's largest online platform for logistics industry having millions of logistics service providers and Exporters/Importers registered on their site. Companies from all over the world are using ShippingExchange to post their freight requirement and to receive competitive quotes from logistic companies.

Project Brief –

- a) Home Page Redesign with light weight responsive CSS.
- b) Mobile App & Web Designing
- c) Video Animation for Site Tutorial

2. www.rebid.me

ReBid.me is one of the fastest growing companies, started with a motive of providing a unique e-commerce platform to buyers & sellers across the globe. The idea is to provide a unique online shopping experience to buyers where they can create request for any product they wish to buy. Rebid.me helps them in taking an informed decision by providing them best buys in terms of quality, pricing and vendor location preferences. Buyers are at an advantage because they can analyse various bids from vendors and choose the best one.

Sellers/Vendors get access to quality leads of buyers which helps them to expand their reach and increase sales volumes significantly. Vendors are encouraged to sell their products by quoting competitive bids for those requests. Alternatively, vendors can also showcase their products in hot deals exclusively. Posting of buying AD and bid submission is absolutely free on Rebid.
