

Post	Product User Experience Designer
No of Positions	1
Company Name	Seclore Technology
Company Profile	<p>Incubated and promoted by IIT Bombay, Seclore Technology develops innovative, ground-breaking solutions that help enterprises counter the most challenging information security threats of the modern world. In today's era of the Cloud-enabled, mobile-driven and borderless workforce, where traditional technologies are ineffective, we provide the security that enables, rather than hinders information sharing and collaboration.</p> <p>Recently identified as a 'Billion Dollar Baby' (www.billiondollarbabies.org), Seclore has more than 4 million users and 420 enterprises spread across 23 countries.</p> <p>At Seclore, you will be enveloped in a vibrant and energetic culture where innovation and creativity set new benchmarks for the Indian software product industry.</p> <p>Visit our website at http://careers.seclore.com for more details.</p>
Responsibilities	<p>As a User Experience Designer you will need to:</p> <ul style="list-style-type: none"> • Take ownership of the user experience design strategy and execution across the entire product line. • Establish UX/UI standards and best practices of User Centered Design and continuously drive towards improving the end user experience. • Take ownership of the end user field research program and consistently gather insight about the end user's context of our product. • Initiate, suggest, and lead the initiative for refactoring the user interactions and interfaces for a more intuitive user experience. • Inspect and analyze functional changes and requirements to identify the UX/UI expectations. • Effectively document and communicate: interaction models, user task flows, wire-frames, screen prototypes and UI specifications for all the new enhancements and changes being done in the Product. • Work closely with the Product Engineering team as the UX/UI advocate and represent the voice of the user. • Work with the visual designer to detail out the UI as per the product objectives and expectations identified during the UX design stage. • Gather metrics about usage statistics, web page traffic and continuously introspect on what works and what doesn't work for end users. • Backup innovative ideas and instincts by gathering factual data and user feedback using surveys and questionnaires. • Keep in touch with relevant technology design trends and keep aligning our product offering accordingly.
Candidate Requirements	<p>You should have:</p> <ul style="list-style-type: none"> • A technical degree (Engineering, MCA) or business degree (MBA, BBA) from a reputed institute • A minimum of 5 years of experience in the software industry.

	<ul style="list-style-type: none"> • Formal qualification in interaction design from a reputed institute. • Excellent analytical skills. • Excellent communication and presentation skills to demonstrate design concepts via visual representations. • Experience working on Web based UI and native apps for Mobiles. <p>It would be nice if you have:</p> <ul style="list-style-type: none"> • A design portfolio to demonstrate your past work. • A certification in User Centered Design practices. • Awareness and exposure to Windows native application design practices. • Awareness and exposure to UI technologies like JQuery, HTML, CSS and JavaScript. • Technical background in software either from software development or systems perspective. <p>Personal Attributes that we are looking for:</p> <ul style="list-style-type: none"> • Self-initiative to take up responsibility and ownership of tasks and ensure end to end delivery and completion with the highest level of quality. • An analytical frame of mind to identify multiple solutions to the same problem, to help in decision making. • An eye for detail and executing assignments with a process oriented approach. • A 'can do' attitude to be able to work within existing constraints and come up with innovative ideas that may not be obvious or apparent. • Maturity and level headedness to work with multiple teams and maintain healthy relationships with various internal and external stake holders.
